## EXPERIENCE

### RAZORPAY | Senior Frontend Engineer

Aug 2021 – Current, Remote

- Architected **Progressive Canary Analysis & Rollout of GraphQL server** with automated zero-touch rollbacks, and 10+ deployment pipelines.
- **Optimized CI build times** and the app size of the iOS app reducing it by 20%.
- Led the successful **major version migration** of apollo-server, NodeJS v18 & Rover CLI that is used by our three client apps. **Improved Developer Experience** by adding a GraphQL Schema Change Summary in every PR.
- **Reduced Android build times by 75%** by an architectural modification, saving up to 90mins of build hours in a month for a single developer.
- **Saved 8m of developer's time per commit** by fixing an issue with the deployment of our GraphQL service in the stage environment.
- Gave a **live workshop** on using analytics events for various pods in the organisation & built multiple dashboards to help the mobile engineering team make more **data-driven decisions**.
- Responded to a sensitive security incident with our **CI-CD** tool in a close span of the incident reported to resolution in just 2 days, for such a complex task.
- Owned the development of a new hero payment product Payment Handle end to end which became a first-touch transaction product **leading by 78.06%**.
- Implemented QR Code product in the mobile app from scratch contributing 47L+ GMV, **without direct involvement** of Product & Design.
- Rolled out 20+ major releases of our mobile app as a **Release Champion on both Android & iOS** platforms with fixing of app review issues.
- Wrote the tech spec for an Event Delight framework & integrated it into the app which was **appreciated across leadership & design**.

### FIRSTCRY | Software Developer

March 2020 – August 2021, Remote

- Single-handedly built Polls feature with multiple poll templates in the **brownfield** React Native mobile app.
- Implemented universal search & built digital product listing for CPID pages.
- Optimized homepage render time & performance of Shopping section.

## PROJECTS

### SCRIPTIFIED

2021 | NextJS, TailwindCSS, React, TypeScript, Strapi, Buttondown

- A progressive web app to publish curated weekly newsletters on React and JavaScript, with all data stored on a headless CMS.

## AWARDS & ACHIEVEMENTS

- **5x Autonomy & Ownership Award** - for delivering numerous critical projects at Razorpay with excellent communication & coordination with stakeholders.
- **1x Challenging the Status Quo Award** - for leading the research & implementation of an initiative to achieve feature parity of the Razorpay Web Dashboard & the Razorpay Mobile App.
- **2nd Prize worldwide in Care.Card UX Contest 2018** - a 55-day React Native challenge where our team won in the "How Are You Feeling Today" category.

## SKILLS

### PROGRAMMING

**Proficient:**

JavaScript, GraphQL, TypeScript, CSS, HTML

**Familiar:**

Java, NodeJS

### LIBRARIES/Frameworks

React Native, React, Apollo GraphQL, Next.js, Jest, React Navigation, Styled Components, TailwindCSS

### TOOLS/Platforms

Git, GitHub, Play Store, App Store, Android Studio, XCode, CircleCI, Fastlane, Spinnaker, Sentry, Firebase, Amplitude, Postman

## EDUCATION

### SKIT

#### Bachelor of Technology

2015 - 2019 | Jaipur

Information Technology

Grade: 72.92%

## INTERESTS

Photography, Solo Travelling, Indie Music, Designing, Hiking
